

②

→ move now to the roadⁱⁿ which we are interested..

★ Light color, rough, curving, flat -

→ IT is 2 Oct 1986. Move back to Mar 1984. 7-22 Mar and begin to describe the 6th Day.

★ Dark, cool damp, I'm at a different position than before

→ In your description, perceive the entire road and describe those things which interest us

★ First light, activity increased off the road.

→ off the road

★ Rough, steep, almost desert landscape. Number of men increased largely. Different kind of robes now. Men bearded. Hearty, brown, thin, majority in 30^s. I'm at the road. Sunrise. Traffic light. I'm going to keep moving through until I find something. 6 Day traffic shortly after sunrise. Cool, brisk, clear. Probably occasional large helicopters - flying things that hover. Large noises. Lot of traffic. ... 2 to 3 hours into morning. Bluish, gray smell. Diesel smell. Engine noises. Foreign language. Very guttural, harsh. Yelling. Feeling of preparation. Two perceptions. Maybe 2 perceptions separate or combined. (1) Convoy from site I to site II. Heavy equipment (2) Military Expeditionary Force. Lot of noise. (Just now, yelling. Yelling not bad. moving / stopping. No big concern. Some minor anticipation. ... moving on. More traffic. Nothing interesting around noon. More traffic site I to site II. Start / stop. Shifting. Feeling that vehicles aren't equipped with sprays. ... Early afternoon - ... lot of traffic.

→ You say it's interesting.

★ only because the traffic is much heavier than other days. Nothing of interest happening. Vehicles in late afternoon are much more hurried. They must be off the road by dark. Something happening at site I

→ Describe that happening

★ noise, dust, some running around. In-coming. not much but some in-coming. Unusual because it is still daylight. Not much damage. Out on road nothing starting now - still travelling from earlier but no new travel... Early evening. Very bright starlight. Some traffic on ends of road vicinity site I/site II. In middle, bare of traffic. Lot of movement off road.

→ By who

★ By robed men. They don't cross the road. They move down next to it but don't cross it. Right now they consider the road theirs but concede road near site I/site II to occupiers... continuing through the night. Coming to following morning.

→ are we on Day 7

★ Yes, the early morning.

→ continue to describe day 7 like the previous day.

★ Road still pretty clear. Not much happening... moving hour for hour... People, Robed people off the road, watching the stay... moving early in the morning... vehicles, not as many as yesterday. People inside are very tired. Warm sunrise making them sleepy... 10, 11, 12, o'clock. Traffic still not heavy as yesterday. Primarily armored vehicles, not tanks, trucks. Patrolled, escorted by helicopters. Not much supplies. Something else.. Very dry here... 1300 hrs.

(4)

★ Quiet day... 1400 hours... There is day of rest feeling, like Sunday's... 1500... 1600... There are some fast movers in the area but not concerned with the road. They are looking in the area north of the road... Things very quiet. Still a lot of (robed) men off the road - waiting... Some short distance travel near site I. Very strange absence of traffic when before it was so heavy. Sense of danger. Sky not as bright as last night. Cool.
... 2000... 2200... 2400...

→ We are now on day 8. Continue on (14 mar)

★ First light, cool, 0800... 0900... → ^{Near} SITE I. Group of vehicles, men off the vehicles, digging by the side of road. There is a vehicle like a large Van. Something on top. Indented - to. - concave - movable - shifting... looks like antennae not sure - raw data - tall, thin, metallic, framework, cross on top - digging in... tunnel, hollow, man made, rough walls, reddish color... Around noon... 1300... half stripes - diagonal stripes, shade of green, long... They're in something wider than it is tall. people are digging, shovels, picks. Vehicles are set up in circular array. Several of the vans with the concave thing on top. Near site I. AT site II - 1400 starting back. Routine traffic. Nothing exciting. Men in the hills are napping. Men on road still digging... 1500 hrs. Men starting to put their clothes back on after digging. Some sort of survey team near where men are digging. Tripod, binoculars. (glasses for look through) all one piece. Getting cooler now. Cloudy. Getting dark earlier because of clouds. Men digging are there for the night. Vehicles form the perimeter. Some incidental traffic. Road is pretty empty now - 1800... 1900... Place where men were digging, generator sounds, noise very loud.

(5)

* Still not much happening along the road. I'm still travelling along the road between site I/site II. Foot patrols. Coming from temporary site. Above the road, movement in the hills. There is a village up here but it seems to be abandoned. "Fred Flintstone Town" 2200... Midnight.... No traffic at all on the road....

→ Stop now.
